| 利用可能 | 利用不可 |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <ul style="list-style-type: none">SameSite by default cookies Treat cookies that don't specify a SameSite attribute as if they were SameSite=Lax. Sites must specify SameSite=None in order to enable third-party usage. – Mac, Windows #same-site-by-default-cookies | Disabled |
| <ul style="list-style-type: none">Cookies without SameSite must be secure If enabled, cookies without SameSite restrictions must also be Secure. If a cookie without SameSite restrictions is set without the Secure attribute, it will be rejected. This flag only has an effect if "SameSite by default cookies" is also enabled. – Mac, Windows #cookies-without-same-site-must-be-secure | Disabled |
| Override software rendering list Overrides the built-in software rendering list and enables GPU-acceleration on unsupported system configurations. – Mac, Windows #ignore-gpu-blocklist | 無効 |

③ 検索結果の中の

- SameSite by default cookies
- Cookies without SameSite must be secure

上記2つが [Default] になっていたら [Disabled] に変更

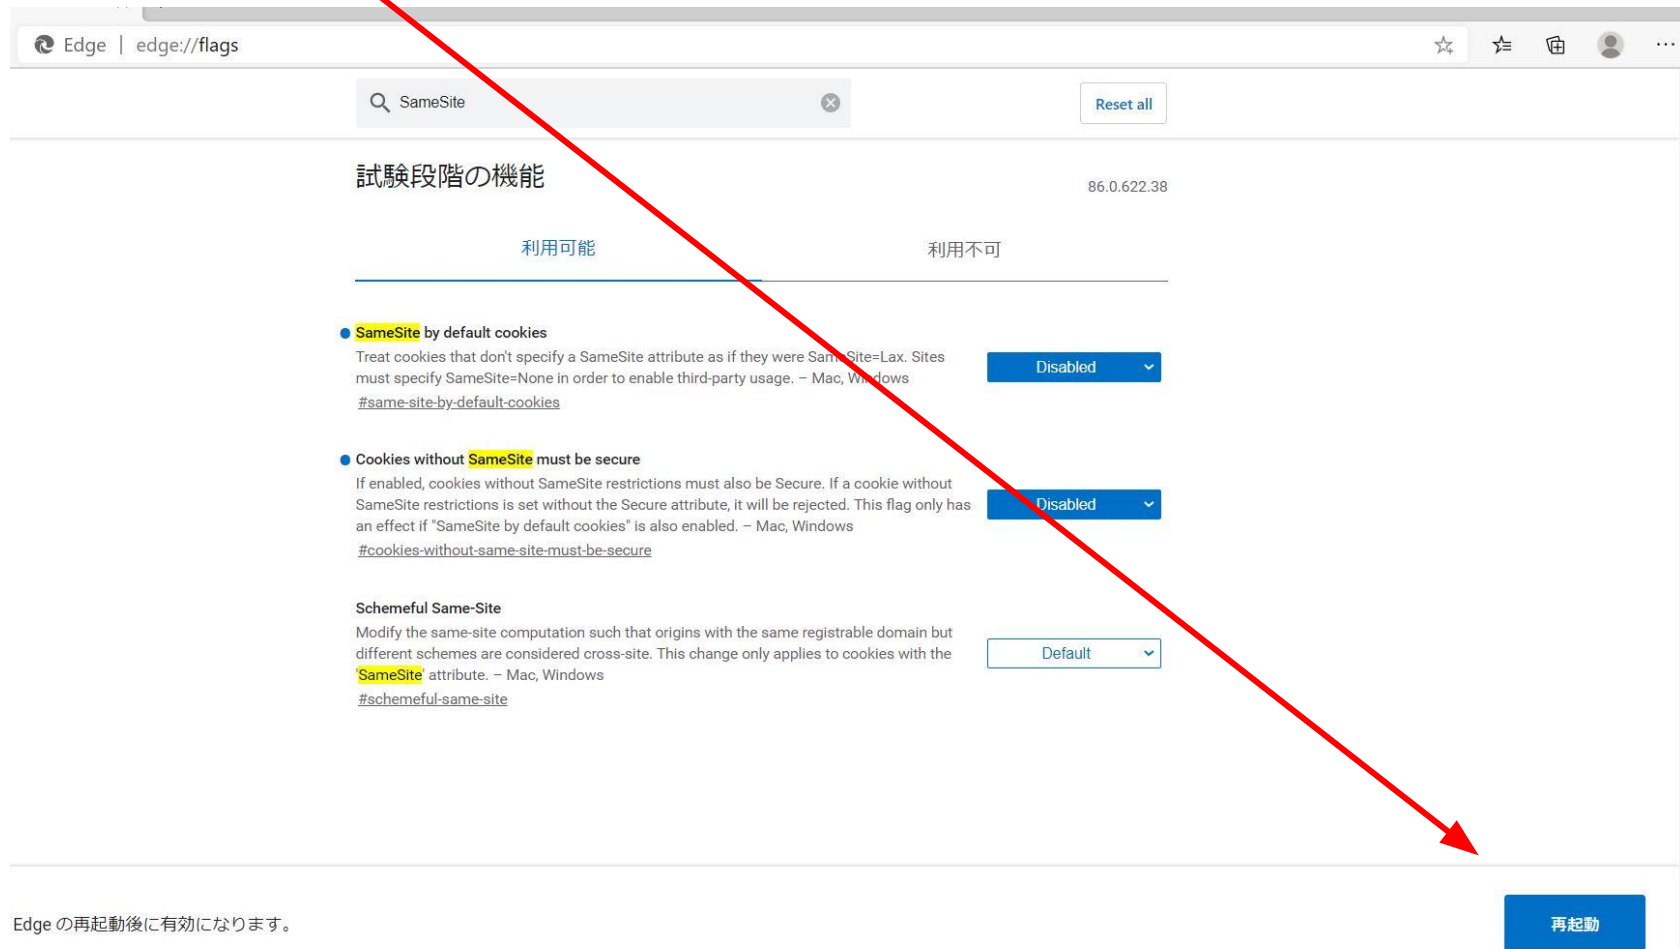

The screenshot shows the Microsoft Edge flags page at `edge://flags`. The search bar contains "SameSite". The page is titled "試験段階の機能" (Experimental features) and shows a version number of 86.0.622.38. There are two tabs: "利用可能" (Available) and "利用不可" (Unavailable). The "利用可能" tab is selected. Three flags are listed:

- SameSite by default cookies**: Treat cookies that don't specify a SameSite attribute as if they were SameSite=Lax. Sites must specify SameSite=None in order to enable third-party usage. - Mac, Windows. [#same-site-by-default-cookies](#). The dropdown menu is set to "Default".
- Cookies without SameSite must be secure**: If enabled, cookies without SameSite restrictions must also be Secure. If a cookie without SameSite restrictions is set without the Secure attribute, it will be rejected. This flag has no effect if "SameSite by default cookies" is also enabled. - Mac, Windows. [#cookies-without-same-site-must-be-secure](#). The dropdown menu is set to "Default".
- Schemeful Same-Site**: Modify the same-site computation such that origins with the same registrable domain but different schemes are considered cross-site. This change only applies to cookies with the SameSite attribute. - Mac, Windows. [#schemeful-same-site](#). The dropdown menu is set to "Default".

Red arrows point to the "Default" dropdown menus for the first two flags.

④ 最後に再起動をクリック

The screenshot shows the Edge browser's flags page at `edge://flags`. The search bar contains "SameSite". The page title is "試験段階の機能" (Experimental features) with version "86.0.622.38". There are two tabs: "利用可能" (Enabled) and "利用不可" (Disabled). Three flags are listed:

- SameSite by default cookies**: Description: "Treat cookies that don't specify a SameSite attribute as if they were SameSite=Lax. Sites must specify SameSite=None in order to enable third-party usage. - Mac, Windows" with link [#same-site-by-default-cookies](#). Status: Disabled.
- Cookies without SameSite must be secure**: Description: "If enabled, cookies without SameSite restrictions must also be Secure. If a cookie without SameSite restrictions is set without the Secure attribute, it will be rejected. This flag only has an effect if 'SameSite by default cookies' is also enabled. - Mac, Windows" with link [#cookies-without-same-site-must-be-secure](#). Status: Disabled.
- Schemeful Same-Site**: Description: "Modify the same-site computation such that origins with the same registrable domain but different schemes are considered cross-site. This change only applies to cookies with the SameSite attribute. - Mac, Windows" with link [#schemeful-same-site](#). Status: Default.

A red arrow points from the top left towards the "再起動" (Restart) button at the bottom right. Below the flags, a note states: "Edgeの再起動後に有効になります。" (Effective after restarting Edge).
